

Offlajn Mosaic Product Slider for VirtueMart

Installing the module and component:

1. Buy and download the desired Virtuemart module and component via the offlajn.com site.
2. Once the download is complete go to the backend of Joomla and login with a user that has administrative rights.
3. Navigate through your menu system to Install/Uninstall
4. Once at the installation screen click the browse button and navigate to where you downloaded the component file. After that install the module too.
5. Once you have the file selected click 'Upload File and Install'

The module and the component is now installed, now let's make sure it's published:

6. Navigate through your menu system to Module Manager.
7. Find the newly installed Virtuemart module and click on it's title.
8. Once you are on the module manager screen click yes to publish the module and if you wish, you can set the module's parameters. Make sure the module is published in the correct position, then click Save at the top right hand corner and you're done!

Once configuration is complete, be sure to test the module immediately to confirm that it functions as planned.
